Internal meeting 07.09.2011

Attendes

Terje Snarby	915 27 390
Erik Bergersen	917 48 305
Sondre Johan Mannsverk	948 15 506
Even Wiik Thomassen	991 61 929
Lars Solvoll Tønder	976 00 317
Sigurd Wien	472 54 625
Jaroslav Fibichr	451 26 314

Agenda

- Project planning

- Requirements

Points

- Sigurd starts an argument about our decision to use LaTex

  - he dislike the push/pull part
  - compilation time included every time you want to see the actual document

- Erik and Even explains the pros using LaTex

  - automated page nr, sections, table of content, refrences, foot notes
  - easy to include all documents to make the final project report

- Lars asks for the downsides

  - hard to include pictures and tables

- Microsoft Word is proposed instead of LaTex (ongoing discussion)

- Google Docs is ruled out regarding the final report. It does not have the required functionality.

- Some of the group members wants a see-what-you-get editor.

  - to avoid compilation and push/pull

- Group decide to stick to yesterdays decision:

  - LaTex for the final report
  - Google Docs for partially done documents

* to support teamwork on one document

- Requirements was not discussed during the meeting, but must be revised before next customer meeting.

- Goal of todays work session: complete the project plan.
